SUMMARY

Full Stack Software Engineer with 2+ years of experience building and maintaining scalable applications using Java, Spring Boot, Angular, REST APIs, Microservices, and relational databases. Experienced in designing transactional workflows, optimizing SQL queries, improving API performance, and delivering production-ready features for platforms serving 30K+ monthly users. Strong understanding of backend architecture, unit testing, CI/CD, debugging, Agile development, and scalable application design.

EXPERIENCE

InstaSpaces — Software Development Engineer - 1 *Gurugram, India | Jul 2024–Present*

- Developed and maintained Java Spring Boot backend services for booking, payments, invoicing, and user dashboards serving 30K+ monthly users.
- Designed relational data models and optimized SQL queries and database indexes, reducing high-traffic API latency by approximately 30%.
- Implemented an idempotent payment webhook system with transactional guarantees, preventing duplicate payments and double-bookings in concurrent workflows.
- Built a Google Sheets → Backend automation pipeline, reducing manual venue onboarding effort from 2 hours to 2 minutes.
- Designed and integrated REST APIs with standardized response patterns and comprehensive OpenAPI/Swagger documentation, improving consistency across services.
- Developed 650+ SEO-friendly dynamic pages using Next.js SSG, improving content scalability, discoverability, and Core Web Vitals.
- Participated in code reviews, debugging, testing, Agile development, and cross-functional design discussions to deliver maintainable production features.

RB Corporation Holdings Pvt. Ltd. — Full-Stack Developer *Internship | Gurugram, India | Feb 2024 – Apr 2024*

- Led a team of 15 interns, mentoring development and delivering production-ready full-stack features using Java, Spring Boot, React, MongoDB and REST APIs.
- Contributed to backend API development, testing, debugging, and Agile/Scrum workflows for live applications.

SELECTED WRITING

Preventing Double-Bookings: How I Built an Idempotent Payment Webhook System. — *Medium, July 2026*
Authored a technical blog on building idempotent payment webhooks — preventing duplicate charges and double-bookings on a platform serving 30K+ monthly users.

PROJECTS

OncoVision — *Cancer Detection from Medical Imaging*

- Convolutional neural network for detecting cancer patterns in medical imaging datasets. Built preprocessing pipelines for image normalization and augmentation; evaluated using precision, recall, and ROC-AUC.

KBForTech LLP — *kbfortech.com · github.com/deepeshovercoder/kbfortech*

- Developed and deployed a responsive website for a cybersecurity firm using modern frontend technologies, implementing reusable UI components, responsive layouts, SEO optimization, and performance enhancements for a seamless user experience.

SKILLS

Languages: Java 11+, JavaScript, TypeScript, Python, SQL
Backend: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, JDBC, Transaction Management
Frontend: Angular, React, NextJS, TypeScript, JavaScript, Tailwind CSS
Databases: MySQL, PostgreSQL, MongoDB, SQL Query Optimization, Indexing, Relational Database Design
Caching and Messaging: Redis, RabbitMQ
Cloud & DevOps: AWS (EC2, S3, RDS, IAM, CloudWatch), Docker, GitHub Actions, CI/CD, Linux/Unix
Testing & Tools: JUnit, Mockito, Integration Testing, Swagger/OpenAPI, Git, Agile/Scrum, Jira, Postman
AI Tools: Claude Code, OpenAI Codex, Cursor, Antigravity IDE

EDUCATION

B.Tech, Computer Science *2021 – 2025*
Maharishi Dayanand University, Rohtak

CERTIFICATIONS & ACHIEVEMENTS

Anthropic – AIFluency: Framework & Foundations • **Anthropic** – Introduction to Model Context Protocol • **Runner Up**, Intercollege Hackathon • **HackerRank** Gold (Python and JavaScript); Certifications in Problem Solving and SQL
