SUMMARY

Full Stack Software Engineer with 2+ years building scalable web applications using Java 11+, Spring Boot, and relational databases. Shipped SaaS platform serving 30K+ monthly users with optimized REST APIs, microservices, and transactional workflows. Strong background in SQL optimization, database design, testing, CI/CD, and cross-functional collaboration. Passionate about clean code, design reviews, and modern SDLC practices.

EXPERIENCE

InstaSpaces — Software Development Engineer - 1

Gurugram, India | Jul 2024–Present

- Developed and maintained Java Spring Boot backend services powering booking, payments, invoicing, and user dashboards for 30K+ monthly users.
- Designed relational data models and optimized SQL queries & indexes, reducing high-traffic API latency by ~30%.
- Implemented idempotent payment webhook system with transactional guarantees to prevent double-bookings and duplicate payments.
- Engineered venue onboarding automation pipeline (Google Sheets → Backend), decreasing manual work from 2 hours to 2 minutes.
- Added comprehensive REST API documentation using OpenAPI/Swagger; established standard response patterns for consistency across services.
- Created and maintained 650+ SEO-friendly dynamic pages using Next.js SSG, resulting in higher organic discoverability, top Google Search rankings, improved Core Web Vitals, and scalable content delivery.

RB Corporation Holdings Pvt. Ltd. — Full-Stack Developer

Internship | Gurugram, India | Feb 2024 – Apr 2024

- Led a team of 15 interns, mentoring development and delivering production-ready full-stack features using Java, Spring Boot, React, MongoDB and REST APIs.
- Contributed to API development, testing, and Agile workflows for live applications.

SELECTED WRITING

[Every Junior Developer Wants to Learn Kubernetes. Almost None Need It.](#) — Medium, July 2026

A practical, honest take on why fundamentals beat buzzwords for junior developers — and a real roadmap for when Kubernetes actually makes sense to learn.

PROJECTS

KBForTech LLP — kbfortech.com • github.com/deepeshovercoder/kbfortech

- Developed and deployed a responsive website for a cybersecurity firm using modern frontend technologies, implementing reusable UI components, responsive layouts, SEO optimization, and performance enhancements for a seamless user experience.

OncoVision — *Cancer Detection from Medical Imaging*

- Convolutional neural network for detecting cancer patterns in medical imaging datasets. Built preprocessing pipelines for image normalization and augmentation; evaluated using precision, recall, and ROC-AUC.

SKILLS

Backend: Java (11+), Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Transactional Workflows

Frontend: Angular, React, NextJS, TypeScript, JavaScript, Tailwind

Databases: MySQL, PostgreSQL, MongoDB, SQL Query Optimization, Indexing, Relational Database Design

Cloud & DevOps: AWS (EC2, S3, RDS, IAM, CloudWatch), Docker, GitHub Actions, Linux, CI/CD

Testing & Tools: JUnit, Mockito, Integration Testing, Swagger/OpenAPI, Git, Jira, Agile/Scrum

AI Tools: GitHub Copilot, Claude Code, OpenAI Codex, ChatGPT, Cursor

EDUCATION

B.Tech, Computer Science

Maharishi Dayanand University, Rohtak

2021 – 2025

CERTIFICATIONS & ACHIEVEMENTS

Anthropic – AIFluency: Framework & Foundations • Anthropic – Introduction to Model Context Protocol • Runner Up, Intercollege Hackathon • HackerRank Gold (Python and JavaScript); Certifications in Problem Solving and SQL
